

3rd Party Application Issues

If you experience issues with third-party applications on your iPhone, iPad, or iPod touch, please provide answers to the questions below.

To help us investigate your third-party application issue, please include this info:

1. Name of third-party app? If possible, please provide a link to the app from the App Store.
2. Have you contacted the app's creator? If so, did they provide any feedback?
3. Does device sync to one computer, more than one, or just iCloud?

If device syncs to one or more computers:
 4. What version(s) of macOS does the device sync to?
 5. Are all computers authorized with the same Apple ID used to purchase the third-party app?
 6. Which options are checked in the Summary tab, when device is connected to your computer? Screenshots help.
 7. Are you syncing apps?
 8. Are you syncing any other types of protected content like movies or TV shows?
 9. Are you using an iPhone, iPad or iPod touch?
 10. What iOS version is installed on the device?
